

EXP NO: 2

Create a Simple Cloud Software Application for Flight Reservation System Using Any Cloud Service Provider to Demonstrate SaaS

Aim

To develop a simple cloud-based Flight Reservation System using Zoho Creator, demonstrating the Software as a Service (SaaS) cloud model for managing passenger booking information and automatically calculating the total ticket amount.

Procedure

1. Log in to **Zoho Creator**.
2. Create a new application named **Flight Reservation System**.
3. Create a form and add the following fields:
 - Passenger Name
 - Flight Number
 - Source
 - Destination
 - Ticket Price
 - Number of Tickets
 - Total Amount
4. Configure **Total Amount** as the output field.
5. Add a Deluge script to calculate:

Total Amount = Ticket Price × Number of Tickets

6. Save the application.
7. Run the application in the cloud.
8. Enter the passenger and flight details.
9. The application automatically calculates and displays the total ticket amount.
10. Verify the output and save the record.

Implementation

```
if(input.Ticket_Price != null && input.Number_of_Tickets != null)
{
    input.Total_Amount = input.Ticket_Price * input.Number_of_Tickets;
}

info "-----";
info "FLIGHT RESERVATION SYSTEM";
info "-----";
info "Passenger Name : " + input.Passenger_Name;
info "Flight Number : " + input.Flight_Number;
info "Source      : " + input.Source;
info "Destination  : " + input.Destination;
info "Ticket Price  : Rs. " + input.Ticket_Price;
info "No. of Tickets : " + input.Number_of_Tickets;
info "Total Amount  : Rs. " + input.Total_Amount;
info "Booking Status : Success";
```

Result

The cloud-based Flight Reservation System was successfully created using Zoho Creator (SaaS). The application accepts passenger and flight booking details and automatically calculates the total ticket amount, demonstrating the Software as a Service (SaaS) cloud computing model.
