

EXP NO: 3

Create a Simple Cloud Software Application for Property Buying & Rental System Using Any Cloud Service Provider to Demonstrate SaaS

Aim

To develop a simple cloud-based Property Buying & Rental System for Chennai City using Zoho Creator, demonstrating the Software as a Service (SaaS) cloud model for managing customer property rental information and automatically calculating the total rental amount.

Procedure

1. Log in to Zoho Creator.
2. Create a new application named **Property Buying & Rental System**.
3. Create a form and add the following fields:
 - Customer Name
 - Property Type
 - Monthly Rent
 - Months
 - Total Amount
4. Configure **Total Amount** as the output field.
5. Add a Deluge script to calculate:

Total Amount = Monthly Rent × Months

6. Save the application.
7. Run the application in the cloud.
8. Enter customer and property details.
9. The application calculates and displays the total rental amount automatically.
10. Verify the output and save the record.

Implementation

```
if(input.Monthly_Rent != null && input.Months != null)
{
    input.Total_Amount = input.Monthly_Rent * input.Months;}}
info "-----";
info "PROPERTY BUYING & RENTAL SYSTEM";
info "-----";
info "Customer Name : " + input.Customer_Name;
info "Property Type : " + input.Property_Type;
info "Monthly Rent : Rs. " + input.Monthly_Rent;
info "Months      : " + input.Months;
info "Total Amount : Rs. " + input.Total_Amount;
info "Booking Status : Success";
info "Location : Chennai";
```

Output

Property Details
