

EXP NO: 5

Create a Simple Cloud Software Application for Library Book Reservation System Using Any Cloud Service Provider to Demonstrate SaaS

Aim

To develop a simple cloud-based Library Book Reservation System for SIMATS Library using Zoho Creator, demonstrating the Software as a Service (SaaS) cloud model for managing library reservations and automatically calculating the total fine amount.

Procedure

1. Log in to Zoho Creator.
2. Create a new application named **Library Book Reservation System**.
3. Create a form and add the following fields:
 - Student Name
 - Book Title
 - Fine Per Day
 - Late Days
 - Total Fine
4. Configure **Total Fine** as the output field.
5. Add a Deluge script to calculate:

Total Fine = Fine Per Day × Late Days

6. Save the application.
7. Run the application in the cloud.
8. Enter library reservation details.
9. The application automatically calculates the total fine.
10. Verify the output and save the record.

Implementation

info "-----";

info "PROPERTY ENQUIRY SYSTEM";

info "-----";

info "User ID : " + input.User_ID;

info "Full Name : " + input.Full_Name;

info "Gender : " + input.Gender;

info "Date of Birth : " + input.Date_of_Birth;

info "Phone Number : " + input.Phone_Number;

info "Email : " + input.Email;

info "Address : " + input.Address;

info "Preferred Location: " + input.Preferred_Location;

info "Property Type : " + input.Property_Type;

info "Budget : Rs. " + input.Budget;

info "Purpose : " + input.Purpose;

info "-----";

info "PROPERTY ENQUIRY STATUS";

info "-----";

info "Registration Status : Success";

info "-----";

Output

User ID	1001
Full Name	preete
Gender	Choice 1
Date of Birth	11-Jan-2026
Phone number	+919823477201
Email	pree8@gmail.com
Address	No 9/11 anna Nagar chennai-34
preferred Location	Choice 2
property Type	Choice 2
Budget	₹ 50,00,000.00
Purpose	Choice 1

Result

The cloud-based Library Book Reservation System was successfully created using Zoho Creator (SaaS). The application accepts library reservation details and automatically calculates the total fine amount, demonstrating the Software as a Service (SaaS) cloud computing model.
