

EXP NO: 4

Create a Simple Cloud Software Application for Car Booking Reservation System Using Any Cloud Service Provider to Demonstrate SaaS

Aim

To develop a simple cloud-based Car Booking Reservation System using Zoho Creator, demonstrating the Software as a Service (SaaS) cloud model for managing customer booking information and automatically calculating the total booking amount.

Procedure

1. Log in to Zoho Creator.
2. Create a new application named **Car Booking Reservation System**.
3. Create a form and add the following fields:
 - Customer Name
 - Car Model
 - Rent Per Day
 - Number of Days
 - Total Amount
4. Configure **Total Amount** as the output field.
5. Add a Deluge script to calculate:

Total Amount = Rent Per Day × Number of Days

6. Save the application.
7. Run the application in the cloud.
8. Enter customer and booking details.
9. The application automatically calculates the total booking amount.
10. Verify the output and save the record.

Implementation

```
if(input.Rent_Per_Day != null && input.Number_of_Days != null)
```

```
{
    input.Total_Amount = input.Rent_Per_Day * input.Number_of_Days;
}
```

```
info "-----";
info "CAR BOOKING RESERVATION SYSTEM";
info "-----";
info "Customer ID : " + input.Customer_ID;
info "Car Model   : " + input.Car_Model;
info "Rent Per Day : Rs. " + input.Rent_Per_Day;
info "Number of Days: " + input.Number_of_Days;
info "Total Amount : Rs. " + input.Total_Amount;
info "Booking Status : Success";
```

Output

< > Edit Duplicate More ▾ X	
car ID	735
car name	Hyundai Creta
Brand	Choice 2
Model	Hyundai
Fuel type	Choice 2
Transmission	Choice 2
seats	5
price per day	₹ 2,500.00
Registration Number	TN01AB1234
Status	Choice 2

Result

The cloud-based Car Booking Reservation System was successfully created using Zoho Creator (SaaS). The application accepts booking details and automatically calculates the total booking amount, demonstrating the Software as a Service (SaaS) cloud computing model.
